

REINFORCED ALUMINIUM TAPE

Reinforced adhesive aluminum tape is impervious to moisture. The tape has extremely strong adhesive properties, excellent thermal insulation properties, suitable for outdoor and indoor use.

Reinforced aluminum tape is used to duct board or pipe section joints and seams; joining and sealing flexible air duct seams and connections. The tape reflects light and heat.

Suitable for use:

- For all surfaces;
- For reinforcement of ducts and pipes;
- Heating and cooling systems;
- Ventilation systems;
- Conditioning systems.

*Limited resistance
